

# Moving Ahead

Vision.Human.Work.

**Pete Kines**

National Research Centre for the  
Working Environment (NRCWE)

Pete Kines is a senior researcher (psychologist, civil engineer, PhD) in the division of safety research at the National Research Centre for the Working Environment in Denmark. He was one of the leaders of a DGUV sponsored trans-European team of researchers looking into 'Zero Accident Vision' (ZAV) in 27 companies in eight countries, with focus on ZAV leadership, commitment, communication, safety culture and learning (2014-2015). A key result was a collection of good practices for companies either embarking or well on their way on their ZAV journey, as well as good practice for establishing and running national Zero Vision networks and forums.
